Steam Market Overview

What does the market look like, and where is game supply concentrated?

117,715	8	2017–2025
Total Games	Core Genres	Trend Window

Game Supply by Core Genre

Genre coverage across the analyzed Steam catalog

Key Insight

Supply is concentrated in Casual, Action, and Adventure.

High genre coverage alone does not indicate attractive market entry.

Report Scope

117,715 games
8 Core Genres
2017–2025 trend window

Focus

Supply · Traction · User Response · Pricing · Market Entry

Supply vs Traction

Does strong user traction justify entering highly supplied genres?

23.41%	1.00	2023–2025
Supply Median	Traction Benchmark	Recent Window

Supply vs Recent Traction

Traction Index: 2023–2025 same-year normalized 100k+ estimated-owner reach. Benchmark = 1.0.

Key Insight

RPG and Strategy combine below-median supply with above-benchmark traction.
Simulation, Action, and Adventure also show strong traction, but with higher supply.

How to Read

Higher X = more genre supply
Higher Y = stronger relative traction

- Upper-left: Candidate Zone
- Upper-right: Competitive
- Low Supply / Weak Traction
- High Supply / Weak Traction

Market Trends

Which genres are gaining or losing relative market presense over time?

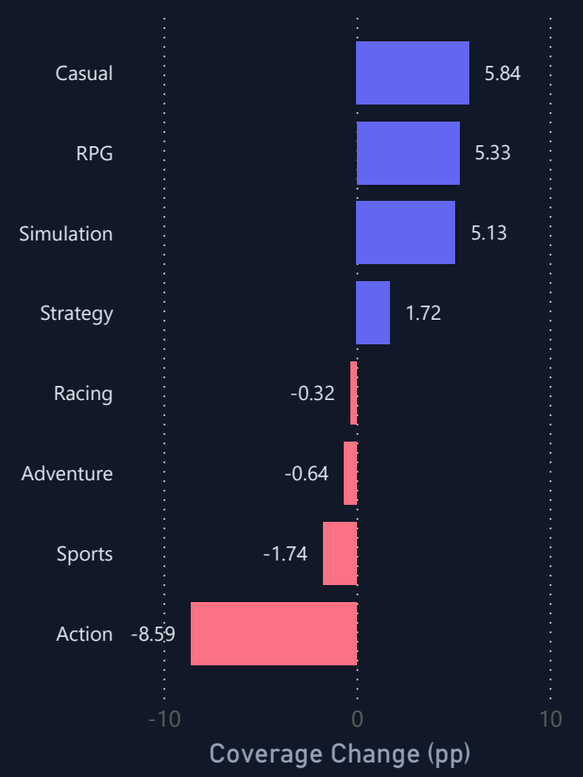

Core Genre Coverage Trend

2017–2025 complete-year releases

Change in Genre Coverage

2017–2025

Note: A decline in genre coverage does **not** mean fewer releases. It means the genre grew more slowly than the overall Core Genre market.

Market Entry Landscape

Which genres deserve further market investigation?

Evidence path · Supply → Traction → User Response → Market Trend

RPG

Lower supply · strongest traction

20.37 Supply Coverage	1.67 Candidate Traction
40.64% Joint Response	5.33 Coverage Change (pp)

Strategy

Lower supply · strong traction

21.41 Supply Coverage	1.41 Candidate Traction
37.01% Joint Response	1.72 Coverage Change (pp)

Simulation

Higher supply · competitive alternative

25.42 Supply Coverage	1.30 Candidate Traction
33.03% Joint Response	5.13 Coverage Change (pp)

Why these candidates emerge

RPG and Strategy combine below-median supply with above-benchmark traction and relatively strong user response. Their increase in relative genre coverage also suggests continued market activity.
Simulation shows strong traction and growth as well, but with higher current supply.

Candidate Deep Dive

Within the strongest candidate markets, what product structures deserve further research?

RPG

PRIMARY

Lower supply · strongest traction

Strategy

PRIMARY

Lower supply · strong traction

Simulation

SECONDARY

Higher supply · competitive alternative

Deep-dive focus · RPG + Strategy · recent releases **2023–2025**

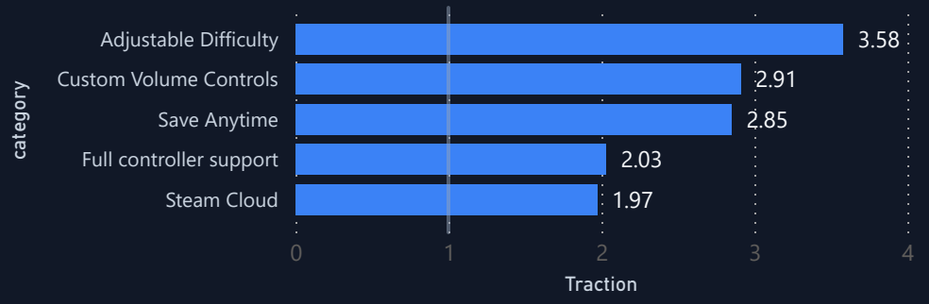

Observed Traction by Player Structure

Recent RPG / Strategy releases, 2023–2025

Supporting Product Signals

Recent RPG / Strategy releases, 2023–2025

Final Takeaway

RPG and **Strategy** emerge as the strongest candidates for further investigation, while **Simulation** remains a more competitive alternative.
Within recent RPG / Strategy releases, multiplayer capability is associated with substantially stronger traction. Adjustable difficulty, custom volume controls, save-anytime support, full controller support, and Steam Cloud also show above-benchmark traction and provide additional hypotheses for product research.
These signals are observational and should be evaluated alongside production scope, technical complexity, and team capability.
